### Oil Business - Oil Development

Oil revenue is expected to be lower initially at \$1.1 million pa as we move into mid 2025 but with further additions total production is anticipated to move above \$2.0 million pa later in 2025-26.

Australia confronts the challenge of finding more domestic oil and gas and producing those reserves. Bounty increased its oil reserves and resources in 2024 and at the end of the quarter Bounty group producing and contingent oil reserves in Queensland are now 313,000 bbls with Surat Basin acquisitions and Watkins North and other NFE projects exploiting the additional Cooper Basin 2023 discoveries.

Bounty sees the recent Federal Government recognition of Australia needing a “Critical Mineral Reserve” as logically demanding development of a “Critical Petroleum Reserve” to ensure processing of the Mineral Reserves.

Bounty’s Southern Surat Basin projects are 100% owned and operated by Bounty and Bounty is looking forward to participation in further NFE and development drilling programs in Naccowlah Block.

### Oil Business - Production:

Bounty continues to produce oil from the Naccowlah Block in SW Queensland.

Bounty expects to commence oil production from the Alton area, Surat Basin, SE Queensland in later 2025.

Bounty’s unaudited petroleum revenue production and sales for the quarter ended 31 March 2025 are summarised below.

## Oil Business – Production and Development:

### SW Queensland

#### ATP 1189P Naccowlah Block and Associated PL's - Bounty 2%; Watkins North 10%

**Location:** Surrounding Jackson, Naccowlah and Watson Oilfields

#### Background - Summary

The Naccowlah Block comprises 1,804 km<sup>2</sup> approximately 6% of which is covered by ATP 1189 (N) and 1 Potential Commercial Area (PCA) application and the remainder in 23 petroleum production leases (PL's).

#### Activities during the Quarter

Principal activities during the quarter were continued oil production. Production averaged 20 bopd net to Bounty in this Quarter.

The operator has identified at least 9 sites for additional appraisal and NFE wells in the Jackson and Watson/Watkins areas of the Block which will be subject to future drilling campaigns planned for 2025

#### Significant Activities Next Quarter

Optimise oil production from the tied in Watkins North discoveries and commence program to extend production in the Jackson Field by completing as yet undeveloped reserves in the Westbourne Formation

## Oil Business – Development:

### Southern Surat Basin Onshore Queensland

#### PL 2 Alton Oilfield and PL 1182 (PL46) Fairymount Oilfield Bounty - 100%;

**Location:** 70 km northeast of St. George and 440 km west of Brisbane, SE Queensland.

#### Background

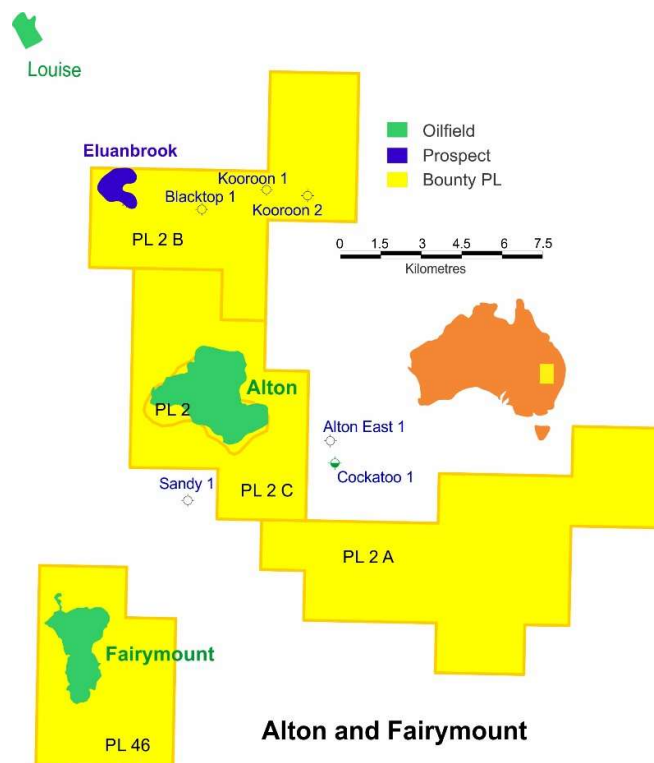

The location of Bounty group Southern Surat Basin interests is shown in the adjacent map. Alton has had historical production of over 2 million barrels from the early Jurassic age Evergreen Formation and Fairymount 1.17 million barrels from the Showgrounds Formation.

Bounty's oil resources in the Southern Surat Basin are light oils (high API) derived from Permian coals (Cooper Basin equivalent). There are 154,000 bbls of 2P and 2C (Contingent) reserves within proven pools for development and potentially another 100,000 bbls in immediate proved closures in the Evergreen Formation.

#### Activities during the Quarter and Next Quarter

Much of the work this quarter was in finalizing compliance matters. During the period Bounty lodged a replacement tenure application allocated PL1182 to replace PL46. Emphasis was on Well Integrity, environmental monitoring and upgrading Environmental Management Systems.

### 2024 Alton Area Plans

Bounty will continue field work to bring 2 wells at Alton back into production starting with Alton 3 well; while it generates a full field development plan. Initial production of 100 bopd is expected from the Alton Area Fields to generate additional gross revenue for Bounty in late 2025 of ~\$2 million pa.

### Major Growth Projects:

### Gas Growth Projects:

#### PEP 11 - Offshore Sydney Basin, New South Wales – Bounty 15%

##### Background

PEP 11 covers 4,576 sq. km immediately adjacent to the largest gas market in Australia and is a high impact exploration project. PEP 11 remains one of the most significant untested gas plays in Australia.

##### Activities during the Quarter

On 17 January 2025 Bounty as a PEP 11 Joint Venture participant with BPH Energy Limited (ASX: BPH) announced that it had been given notice by NOPTA that the Joint Authority had refused the Joint Venture's Applications for extensions and variations made on 23 January 2020 and 17 March 2021. The PEP-11 permit nonetheless continued in force from 17 January 2025 pending renewal.

The Joint Venture has applied to the Federal Court for a judicial review of the decision and on 17 March 2025 the Federal Court granted a suspension of the decision until further orders of the Court to settle a schedule for the lodgment and consideration of submissions by the parties.

On 12 February 2025 BPH announced that Asset had applied to the Federal Court for an Originating Application (the "Application") for judicial review pursuant to s 5 of the Administrative Decisions (Judicial Review) Act 1977 (Cth) and s 39B of the Judiciary Act 1903 (Cth) to review the Decision. The Application seeks:

1. An order quashing or setting aside the Decision;
2. A declaration that the Decision is void and of no effect; and
3. An order remitting the First Application and Second Application to the Joint Authority for reconsideration according to law.

On 17 March 2025 the Federal Court made orders by consent for the further conduct of the Application which will lead to a 2 day hearing currently expected for 16 September 2025 and 17 September 2025.

Pursuant to subsection 15(1)(a) of the Administrative Decisions (Judicial Review) Act 1977 (Cth), the operation of the decision of the Commonwealth-New South Wales Offshore Petroleum Joint Authority comprised of the first respondent and the second respondent made on 16 January 2025 is suspended with effect from 16 January 2025, until further order of the Federal Court.

PEP-11 continues in force and the Joint Venture is in compliance with the contractual terms of PEP- 11 with respect to such matters as reporting, payment of rents and the various provisions of the Offshore Petroleum and Greenhouse Gas Storage Act 2006 (Cth).

### **Jacobson Project Offshore Carnarvon Basin WA – Bounty right to earn 25% with options to earn up to 50%**

**Location:** 70 km. East of Barrow Island WA

**Titles:** EP 490 and 491 and TP 27 totalling 3,197 km<sup>2</sup> - Bounty right to earn 25% - 50%

**Main Points.** On 8 August 2024, Bounty announced to ASX that the operator Coastal Oil & Gas (Coastal) had executed a binding Heads of Agreement (“HoA”) with a Rig Contractor that underpins the key commercial terms of a rig contract subject to regulatory approvals.

EP 475 lapsed and the operator, Coastal through its agent, continued renewal and extension applications and filed submissions and reports to DEMIRs for the remaining Permits. Bounty has assisted this process. Potential funding options for drilling were explored.

Bounty continued minor expenditure during the period aimed at defining the deeper gas potential in the Permian age sequences.

#### **Activities Next Quarter**

Drill timing is dependent on progress by Coastal to obtain extensions of the term of the 3 extant Permits. Further extensions will likely depend on drill funding. The remaining Permits extend beyond 2025. Bounty will monitor progress.

### **Rough Range Project Onshore Carnarvon Basin – WA**

#### **L 16 – Bounty 100%**

**Location:** Exmouth Gulf – WA

**Background.** The principal undrilled prospect is the 3 million bbls potential Bee Eater prospect in the southern section of L 16.

#### **Activities during the Quarter and next Quarter**

Seismic re-processing for L 16 is planned for 2025.

During the quarter Bounty was updating resource and environmental compliance documentation.

#### **Rights Issue - Entitlement Offer**

The Company completed its pro rata non-renounceable Entitlement Offer announced on 18 November 2024, which closed at 5:00pm (AEST) on 31 January 2025 (Closing Date).

## INFORMATION REQUIRED UNDER CHAPTER 5 OF ASX LISTING RULES

Estimates of oil volumes presented in this announcement are:

- Reported at the date of this release
- Determined as an estimate of recoverable resources in place unadjusted for risk
- Best Estimate Prospective Resources unless specified as 2C in which case they are Proved and Probable Contingent Resources
- Estimated using probabilistic methods unless indicated with an "\*" in which case they are deterministic
- If specified as " boe" then they are converted from gas to oil equivalent at the rate of 182 bbls  $\equiv$  1 million standard cu ft of gas
- Reported at 100% project equity unless specifically stated as net to Bounty

The estimated quantities of petroleum that may potentially be recovered by the application of a future development project relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration, appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.
